ACKNOWLEDGEMENT

We take this opportunity to express our sincere gratitude to all those who helped us in various capacities in under taking project devising the report. We are privileged to express our sense of gratitude to our respected lecturer Anish Ansari whose unparalleled knowledge, moral fiber and judgment along with his was an immense in completing the project. We are grateful to the HOD of Diploma in computer engineering Er. Sarita Jayaswal and Acting Principal of Birgunj Institute of Technology Er. Niraj Shriwastav for the brain wave and encouragement given.

Last but not the least; we would like to express our deep sense and earnest thanks giving to our dear parent for their moral support and heartfelt co-operation in doing the project. We would also like to thanks our friends, who direct or indirect help has enabled us to complete this project successfully. We would also like to thank to our BIT Engineering Collage.

ABSTRACT

The “NEWS & MEDIA PORTALS “is a web application, which is design to provides news and information about current events, issues and other topics of interest. Online “NEWS & MEDIA PORTALS “typically offer a range of content, including articles, videos, podcasts, and other multimedia formats, and may cover a wide range of topics such as politics, business, sports, entertainment, and more. They are a popular source of information for people who want to stay informed about current events and news from around the world.

The main objectives building and developing of “NEWS & MEDIA PORTALS “to provide instant news to news readers. It is a digital version of a traditional print newspaper. It is typically including same types of contents as print newspaper such as latest news, articles, educations, health tips, breaking news, political, sports, and it include additional features such as videos, interactive graphics etc.

To make this software we need to install LARAVEL because Laravel provide a drag and drop facilities to make software easily and more attractive. And by the help of XAMPP server studio. we can store data in database and retrieve it when we needed. We are providing a high security as a user name and password to enter. Only Authorized person have a right to access this software and he/she can only manage, delete, modify the database. It is user friendly system. Occurrence of error is less and working with software is smooth.
